

BENECOR DEF STATIONARY POWER DISPENSER

BENECOR is proud to be the first to offer these expertly engineered, innovative solutions for dispensing DEF to your Prime Power Supply. When you choose a BENECOR Skid Enclosure With Stationary Power Integration you can be confident that your system has been tested down to the smallest detail.

PROVEN: Our BENECOR Stationary Power DEF Dispenser is already in use with the top commercial and industrial diesel power supply brands in the market.

RELIABLE & DURABLE: Our insulated prime power solutions are built for reliability and durability in challenging warm and cold weather applications.

MULTI-PURPOSE: In addition to supplying DEF to your prime power unit, this original BENECOR design can serve a dual purpose by dispensing DEF to your on site equipment.

CUSTOM: We can work with any OEM. If we don't already have a design that integrates with your equipment our BENECOR experts will design, engineer & manufacture a solution to interface with your specific engine application.
